SUMMARY

Bachelor of Information Technology (Hons) student at Universiti Teknologi PETRONAS (UTP), actively **seeking an 8-month internship from January 2026 to August 2026**. Equipped with strong programming skills, hands-on experience in database management, and a solid foundation in software engineering and data analysis. Fluent in **Malay** and **English**, with excellent communication abilities and a passion for leveraging technology and data to deliver innovative solutions.

EDUCATION

MRSM Bentong, Pahang, SPM in Electrical and Electronics Engineering **Feb 2017 - Mar 2022**
- Sijil Pelajaran Malaysia (SPM): 1A+, 2A, 3A-, 1B+, 1B, 2C

Foundation in Electrical and Electronics Engineering **Sep 2022 - Aug 2023**
- University Technology PETRONAS (UTP)

Bachelor of Information Technology (Hons), Minor in Financial Management **Jan 2024 - Present**
- University Technology PETRONAS (UTP)
- **CURRENT CGPA** : 3.16
- **Expected Graduation :** April 2027

ACADEMIC PROJECTS

Spelling Bee Game (C Programming) | UTP **Sept 2023**
- Designed and implemented a multi-level Spelling Bee game in C using the gfx library, combining text-based play with GUI interaction.
- Integrated scoring system, pangram detection, and dictionary-based word validation to enhance gameplay.
- Developed with modular user-defined functions for readability and efficient handling of game logic.

Spotify Database Project (Database Design & SQL Implementation)| UTP **Jan 2024**
- Designed an EER diagram with superclass/subclass structures, normalized to 3NF, and mapped into a relational schema.
- Implemented SQL scripts to create, populate, and drop 20+ tables, each with 10+ attributes and sample data.
- Developed complex queries with joins, grouping, aggregation, and views to simulate real-world use cases.

Airline Booking System (Java) | UTP **May 2024**
- Designed and implemented an object-oriented Airline Booking System in Java, featuring a GUI interface for booking and flight management.
- Integrated with phpMyAdmin database to handle flight schedules, customer details, and ticket records.
- Applied OOP concepts such as inheritance and encapsulation for modular, maintainable code.

Career Starter Website (HTML) | UTP **May 2024**

- Developed a web application using HTML, CSS, and JavaScript with database integration to manage user accounts and company details.
- Implemented a comprehensive UI/UX design for smooth navigation and an intuitive overall experience.
- Enabled users to login and search/view company information through a responsive interface.

UStudentMed – Campus Health Companion App (Figma) | UTP **Jan 2025**

- Designed and prototyped a digital healthcare platform using Figma and Canva to improve appointment booking and medical record access.
- Conducted requirement gathering and usability testing with students and medical staff to refine user experience.
- Applied HCI principles to develop an intuitive, accessible, and user-friendly interface.

Weather Forecast Accuracy IoT System (Python, Power BI) | UTP **May 2025**

- Built a Python-based system to continuously collect real-time and forecasted weather data from the Open-Meteo API over 3 days.
- Stored collected data in a .db file, converted it to Excel using Python for easier analysis and accessibility.
- Designed interactive Power BI dashboards and applied Mean Square Error (MSE) to evaluate forecast accuracy.

PROFESSIONAL SKILLS

PROGRAMMING LANGUAGE

- C (Intermediate)
- C++ (Intermediate)
- Java (Intermediate)
- HTML (Intermediate)
- CSS (Intermediate)
- JavaScript (Intermediate)
- PHP (Basic)
- Python (Intermediate)

WEB DESIGN/DEVELOPMENT

- HTML (Intermediate)
- CSS (Basic)
- JavaScript (Basic)

DATABASE MANAGEMENT

- MySQL (Intermediate)
- phpMyAdmin (Basic)
- R Script (Basic)

GRAPHIC DESIGN

- Adobe Photoshop (Basic)
- Adobe Premiere Pro (Basic)
- Canva (Expert)
- Figma (Intermediate)

MICROSOFT OFFICE

- Excel (Intermediate)
- PowerPoint (Expert)
- Word (Expert)
- PowerBI (Intermediate)

SOFT SKILLS

- Problem-solving & analytical thinking
- Communication & presentation
- Teamwork & collaboration
- Time management
- Attention to detail

VOLUNTEER EXPERIENCE & EXTRA-CURRICULAR ACTIVITIES

STEM Forward with Energy4me: Powered by ConocoPhillips & the US Embassy | Sabah State Library (Tanjung Aru Branch) **Sep 2025**

- Committee of Logistics, managed resources, schedules, and on-site coordination for STEM outreach activities.
- Assisted in setting up and facilitating interactive science and engineering demonstrations.
- Collaborated with advisors, USM and team members to ensure smooth program execution.
- Supported participant engagement and encouraged student interest in STEM-related fields.
